PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate with strong hands-on experience in Python, data science, and Django-based web development. Skilled in data analysis, machine learning, and building end-to-end applications that combine backend logic, data processing, and visualization. Actively seeking entry-level roles in Data Science, Python Development, or Software Engineering.

EDUCATION

Bachelor of Technology - Electronics and Communication Engineering 2020 - 2024

A. P. J. Abdul Kalam Technological University , Thiruvananthapuram

SKILLS

Programming: Python, JavaScript, SQL

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Machine Learning, Deep Learning, NLP, Computer Vision, OpenCV

Web: Django, Django ORM

Visualization: Power BI, Tableau, Excel

Tools: GitHub, Microsoft Word, PowerPoint

PROJECTS

1. **Development Of Intelligent Wheelchair for Disabled Persons with Body Movement Control**

- Designed and developed a smart wheelchair system using an ESP32 microcontroller and wearable gesture sensors for hands-free navigation.
- Implemented gesture-based movement control (forward, backward, left, right) using accelerometer threshold values.
- Integrated ultrasonic sensors for obstacle detection and safety alerts using buzzer and LED indicators.
- Enabled real-time hardware–software interaction to improve mobility assistance and user independence

2. Micro-Region Job Market Radar for Freshers

- Analyzed job postings to identify district-level job demand and fresher hiring trends.
- Cleaned and processed job market data using Python, Pandas, and NumPy.
- Extracted skills from job descriptions using basic NLP techniques.
- Classified jobs by domain and clustered regions using machine learning.
- Visualized job trends and skill demand using charts and dashboards.

3. Multi-Shop E-Commerce Web Application

- Developed a Django-based multi-vendor e-commerce platform with user authentication and role-based access.
- Implemented product listing, category management, shopping cart, and order workflows using Django ORM.
- Designed backend logic and database models with relational database support for buyers and sellers.
- Built core e-commerce functionalities aligned with real-world online shopping systems

EXPERIENCE

- Python with IoT – Intern, KELTRON
  Worked on Python-based IoT applications involving sensors and real-time data processing.

LEADERSHIP

- University Union Council 2022-2024

CERTIFICATIONS

- Python with IoT (Intern) | KELTRON 2023
- Data Science and Artificial Intelligence 2025
